MANAGEMENT OF WHITE-TAILED DEER
1910 to 1966**

By

N. W. Hosley, Professor of Forestry
Southern Illinois University, Carbondale

Special Scientific Report--Wildlife No. 112
Washington, D.C. January 1968

PREFACE

This bibliography was compiled to partially update and include references previously cited (Hosley, N. W., 1956, "Management of the White-tailed Deer in Its Environment," pages 187-259 of "The Deer of North America", edited by Walter P. Taylor and published by the Stackpole Company, Harrisburg, and the Wildlife Management Institute, Washington, 668 pages). That chapter was completed in 1950. Excluded from this revision are general accounts with no apparent, new contribution to management, regional population data, annual kill reports, articles on diseases and parasites, taxonomic and physiologic studies, and mimeographed material not easily obtainable. Most of the main forestry and wildlife periodicals and the indexing publications such as Biological Abstracts, Wildlife Review, and Dissertation Abstracts are covered. Abbreviations used follow, in general, those approved for the Journal of Wildlife Management.

CONTENTS

	Page
General	1
Regional studies	4
Historical studies	12
Movements	13
Food habits	14
Food production	17
Nutrition	23
Competition for food	27
Forage surveys	28
Damage and prevention	30
Cover type use	34
Predation	36
Hunting and population control	37
Population dynamics	40
Census	43
Miscellaneous	46

The Department of the Interior, created in 1849, is a Department of Conservation, concerned with management, conservation, and development of the Nation's water, wildlife, fish, mineral, forest, and park and recreational resources. It has major responsibilities also for Indian and Territorial affairs.

As America's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States, now and in the future.
